Note: Given the nature of condominium ownership, the Unit boundaries are precisely defined in such a manner so that all components of the Building which are (or are potentially) utilized either by other Units or the Common Elements are excluded from the Unit. This would exclude, for instance, all structural walls, columns etc. and essentially limits the Unit boundaries to the interior airspace between the perimeter walls and excludes all interior structural components. For the precise Unit boundaries, see Section 3.2 of the Declaration. For your reference, the area of the Unit, determined in accordance with these defined Unit boundaries, is set forth hereon (and labeled as "Technical area"). Please note that the unique way of defining the boundaries actually makes the Unit appear to be smaller than it actually would be if standard architectural measuring techniques were used. Typically, apartments are measured to the exterior boundaries of the exterior walls and to the centerline of interior demising walls, without excluding areas that may be occupied by columns or other structural components. The area of the Unit calculated in accordance with normal architectural measuring standards is set forth as "Marketing Area".

(*) Assessments based on Technical Area

(**) Measurement is "paint to "paint" and does not include the drywall. The Unit boundaries shall be deemed to be the area immediately behind the drywall and/or gypsum board, so that for all purposes hereunder the drywall and/or gypsum board (and furring strips/space when attached to CBS and concrete surfaces), so that for all purposes hereunder the drywall and/or gypsum board and furring areas shall be deemed part of the Unit and not part of the Common Elements).
